About Arrow Global

Established in 2005, Arrow Global is a leading European investor and asset-manager in non-performing and non-core assets. We identify, acquire and manage secured and unsecured loan and real estate portfolios from financial institutions, such as banks and credit card companies.

We play an active role in helping financial institutions reduce their balance sheets and recapitalise in order to increase mainstream lending. By purchasing and managing non-performing loans and other non-core assets, we provide valuable capital and expertise to a growing European market.

We are a regulated business in all of our European markets, managing over £51.5 billion assets under management across five geographies with over 1,800 employees.
